Profile

Highly motivated full-stack software developer with hands-on experience in PHP, Laravel, and Vue.js. Skilled in building scalable, business-logic-driven web applications and transforming requirements into reliable, high-quality solutions. Proven ability to contribute effectively in collaborative, fast-paced development teams while delivering real-world projects.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer, MaharNet ISP Company	10/2024 – 12/2025 Yangon (Hybrid)
- Engineered and maintained the UserApp backend portal using Laravel, enabling centralized management of mobile application features. - Developed and deployed robust RESTful APIs for mobile and web platforms to handle user authentication, data management, and service integrations. - Integrated Firebase services, including Push Notifications and Remote Config, to drive real-time user engagement and facilitate feature toggling. - Spearheaded feature development for the MPlus CRM & Network Management System, a custom solution for managing the complete customer lifecycle. - Optimized operational efficiency by integrating multiple Splynx APIs for billing, network monitoring, and customer support into the MPlus system. - Implemented Redis caching to enhance application performance, reduce database load, and improve response times across critical backend services.	
Intern Technology Associate, EduClaas	03/2024 – 09/2024 Singapore (Remote)
- Architected a Customer Contact Management System to streamline lead assignment from social media campaigns to the sales team. - Developed and implemented a weighted round-robin algorithm to ensure fair and efficient lead distribution, accounting for agent availability and status. - Engineered a seamless integration with HubSpot CRM, synchronizing lead data to align with existing sales workflows and enhance reporting accuracy.	

EDUCATION

Pearson BTEC Diploma in IT, Pearson BTEC Diploma in IT, EduClaas (Lithan)	06/2023 Yangon
